EDUCATION

Bahir Dar University

B.Sc. in Computer Science — CGPA: 3.19/4.00

Bahir Dar, Ethiopia

Sep 2021 – May 2026

- **Relevant Coursework:** Data Structures, Algorithms, Database Systems, Software Engineering, Web Development, Operating Systems, Computer Networks

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, C++, PHP

Frameworks: React, Next.js, Node.js, Express, Django, Tailwind CSS, React Native

Databases: PostgreSQL, MongoDB, MySQL, Prisma

Tools: Git, Vercel, Postman, XAMPP

EXPERIENCE

Software Developer (Team Project Member)

Bahir Dar, Ethiopia

BiTec Incubation Center, Bahir Dar Institute of Technology

2024 – 2025

- Collaborated with team of software engineering students to develop custom solutions for incubation center's startup programs using Git/GitHub.
- Contributed to full SDLC: requirements gathering, system design, coding, testing, and deployment.
- Received mentorship from faculty and industry professionals; gained practical agile and client communication experience.

PROJECTS

University Selection Platform — [GitHub](#)

Next.js, React, Node.js, PostgreSQL, Prisma, React Native, Expo

- Built full-stack platform with Next.js (App Router) and React, implementing role-based dashboards for students, universities, and MOE admins.
- Developed cross-platform mobile app using React Native and Expo for university browsing, applications, and placement tracking.
- Designed PostgreSQL database with Prisma ORM, implementing JWT authentication (30-day expiry) and email verification via Nodemailer.
- Configured CORS middleware for secure communication between Next.js backend, web frontend, and mobile app.

AddToCare — Women Empowerment Platform — [GitHub](#)

Next.js, React, Node.js, PostgreSQL, Prisma, Tailwind CSS

- Engineered full-stack platform with Next.js/React featuring three-dashboard architecture: Company, Admin, and User.
- Designed revenue-sharing model using PostgreSQL transactions for atomic fund allocation from product sales to women's support.
- Built dynamic product management with Prisma ORM: CRUD operations, search, sales tracking with real-time analytics.
- Deployed on Vercel with serverless API routes for authentication and data processing.

Internship Placement Platform — [GitHub](#)

JavaScript, PHP, HTML, CSS, MySQL, XAMPP

- Developed full-stack PHP/MySQL platform for students to search/apply for internships and companies to manage postings.
- Built secure company dashboard with PHP sessions for internship posting, applicant tracking, and status management.
- Created student dashboard with dynamic search/filter using HTML/CSS/JS, connected to PHP endpoints.
- Designed normalized MySQL database with foreign keys and indexes for users, internships, applications, and company profiles.

Broker Management System — [GitHub](#)

JavaScript, PHP, HTML, CSS, MySQL, XAMPP

- Built comprehensive platform for real estate/insurance brokers using PHP/MySQL with role-based access control.
- Designed client management module with full CRUD operations and communication tracking via relational database.
- Developed reporting dashboard with PHP displaying key metrics via optimized SQL queries.
- Implemented secure authentication with PHP sessions and password hashing for user-specific data access.

ACHIEVEMENTS

- **3rd Place – Women in Tech Hackathon (2024)** — Developed working prototype within 24 hours as part of 3-person team; recognized among 8+ teams for technical execution and user-centered design.
